

Green Mountain Marine Services

We are seeking a highly skilled and motivated **Mechanic / Welder** to join our growing team. This position combines shop and field work, providing an opportunity to work on a wide variety of equipment, marine construction projects, custom fabrication jobs, and welding projects throughout Vermont and the Lake Champlain region.

We are looking for an individual who is both an experienced mechanic and a highly competent welder capable of performing structural welding, custom fabrication, equipment repairs, and field service work with minimal supervision.

Primary Shop Location: Grand Isle, Vermont

Position Type

- Full-Time Preferred
- Part-Time Considered for the Right Candidate
- \$30–\$45+ per hour, depending on experience

Benefits

- Paid Time Off (PTO)
- Paid Sick Time
- Four-Day Work Week
- Overtime Opportunities
- Flexible Scheduling for Qualified Candidates
- Opportunities for Advancement and Growth

Primary Responsibilities

Welding & Fabrication

- Perform structural welding and fabrication projects for customers.
- Complete field welding repairs on customer equipment and infrastructure.
- Repair, modify, and maintain company barges, marine equipment, trailers, and specialty equipment.
- Perform MIG, TIG, Stick, and Flux-Core welding processes.
- Read and interpret blueprints, sketches, and fabrication drawings.
- Design and fabricate custom tools, attachments, and equipment to support unique construction and marine projects.
- Complete both shop-based and mobile welding operations.

- Maintain a high standard of workmanship, safety, and quality control.

Mechanical Repair & Maintenance

- Diagnose, repair, and maintain company equipment including:
 - Excavators
 - Wheel loaders
 - Trucks and service vehicles
 - Equipment trailers
 - Hydraulic systems
 - Marine vessels
 - Inboard and outboard engines
 - Pumps and auxiliary equipment
- Perform preventative maintenance and inspections.
- Troubleshoot mechanical, hydraulic, electrical, fuel, and engine systems.
- Assist with emergency repairs to keep equipment operational and minimize downtime.

Field Service Work

- Travel to project sites to perform welding, fabrication, and mechanical repairs.
- Work independently in the field to diagnose problems and develop repair solutions.
- Represent GMMS professionally while working on customer job sites.
- Maintain accurate records of repairs, materials, and labor.

Qualifications

- Strong welding and fabrication experience required.
- Demonstrated proficiency in MIG, TIG, Stick, and Flux-Core welding.
- Ability to perform structural welding and field repairs with confidence.
- Mechanical experience working on heavy equipment, trucks, trailers, marine equipment, or related machinery.
- Ability to troubleshoot and repair hydraulic and mechanical systems.
- Valid driver's license required.
- CDL preferred but not required.
- Ability to operate excavators, loaders, forklifts, and other heavy equipment is a plus.
- Ability to lift 50+ pounds and work in varying weather conditions.

Desired Skills

- Marine construction or marine equipment experience.
- Diesel engine diagnostics and repair.
- Hydraulic system diagnostics and repair.
- Custom fabrication and equipment design.
- Experience working independently with minimal supervision.

- Strong problem-solving skills and attention to detail.

Why Work at GMMS?

At Green Mountain Marine Services, no two days are the same. One day you may be repairing a hydraulic system on an excavator, the next day welding on a barge, fabricating a custom attachment, repairing a boat engine, or performing structural welding in the field. We take pride in solving unique problems and building custom solutions that many companies won't tackle.

If you're a highly skilled welder and mechanic who enjoys variety, independence, and challenging work, we'd like to hear from you.

To Apply: Submit your resume, work history, certifications, and any examples of fabrication or welding projects to employment@gmmsvt.com.
